Mandatory Section for applicants to the one year MPH program (Year 2): concentration choice.

Each applicant has to declare his/her wish to enrol either in the *General program* of the MPH or in one of the *Concentrations/tracks*. To hold an MPH “concentration”, you have to choose all the minor and major modules (see below) **BUT one** (at most) from the same track. When 2 or more minor or major modules are from different tracks, the MPH is labelled as “General program”. For choosing the track please check the list of modules per track provided in Appendix 1 and read carefully the description of each module : <http://mph.chesp.fr/year-2/>

- Minors are “orientation modules” → at least 2 modules are offered in each track.
- Majors are high standard “specialisation modules” → 3 modules are offered in each track.

Important notice: admission in the MPH is primarily based on excellence. It also aims to compose groups of students from different backgrounds and with different professional perspectives. Therefore the balance in the number of students in the six tracks (including the general programme) is a selection criterion. Once admitted to the MPH for a given track, Year 2 students are expected to stick with the choices they were selected for.

Minor and Major choice - All minor or major modules last one week.

Please note that only one track can be selected among the 6 tracks proposed. If you quote more than one track, your application will be studied as a “General program” application
