

## Syllabus of teaching unit “Introduction to biostatistics”

| Module                            | A Primer of Biostatistics  |
|-----------------------------------|--|
| <b>Coordinator</b>                | Nolwenn Le Meur, PhD<br>EHESP, METIS department<br>Nolwenn.LeMeur@ehesp.fr   |
| <b>Dates</b>                      | September 2020: 21-23<br>October 2020: 19-21<br>November 2020: 16-18<br>December 2021: 14-16<br>January 2021: 25-27<br>February 2021: 25   |
| <b>Credits/ECTS</b>               | 10,5 ECTS  |
| <b>Duration</b>                   | Lectures, case studies, group work, field studies and readings = 90 hours  |
| <b>Location</b>                   | EHESP, 20 avenue George Sand – 93 210 La Plaine Saint-Denis  |
| <b>Description</b>                | <p>The main objective of this biostatistics program is to give primer biostatistical concepts and methodological key to comprehend public health data analysis of a public problem whatever the topics. More precisely, this course covers the basic tools for the analysis and presentation of data.</p> <p>Each concept will be presented during a short lecture and followed by an application including exercises, cases study, articles/report discussion and data analysis on computers. Those applications cover different public health topics. The data analysis is carried out using Excel, STATA or R.</p>  |
| <b>Prerequisites</b>              | Attendance to all sessions of Computer labs (as Excel, Stata &/or R will be required to go through some assignments)   |
| <b>Course learning objectives</b> | <p>Students who successfully complete this course will be able to</p> <ol style="list-style-type: none"> <li>(1) To conduct preliminary/simple discussion and criticism on reports and articles applying biostatistics to public health with a focus on epidemiology</li> <li>(2) To conduct preliminary/simple statistical analysis and discuss plans for more sophisticated statistical analyses</li> <li>(3) To work with scientific experts including biostatisticians, epidemiologists and public health professionals</li> </ol> <p>The learning objectives are:</p> <ul style="list-style-type: none"> <li>• Interpret graphical summaries and statistical tables</li> <li>• Criticize the statistics of simple epidemiological studies</li> <li>• Describe a study population using the appropriate indicators</li> <li>• Formulate statistical hypothesis according to the objective aimed by a study</li> <li>• Measure the strength of the association between two quantitative or qualitative variables and interpret it</li> <li>• Apply simple statistical tests using the R or STATA software and interpret the results</li> <li>• Summarize statistical results and write the material, methods and result sections of a report/article</li> <li>• Follow the step by step procedure to obtain an informative linear model and interpret it</li> </ul> |

|  |  |
|--|--|
|  | <ul style="list-style-type: none"> <li>Assess the validity of a linear model</li> </ul>  |
| <p><b>Teaching unit structure</b><br/>(details of sessions title/speaker/approx. duration)</p> | <ol style="list-style-type: none"> <li>1) Descriptive statistics <ol style="list-style-type: none"> <li>a. Central parameters, Nolwenn Le Meur: 4h00</li> <li>b. Dispersion, Nolwenn Le Meur, 4h00</li> <li>c. Graphics, Nolwenn Le Meur, 4h00</li> <li>d. Introduction to descriptive statistics in spatial analysis, Cindy Padilla 3h</li> <li>e. Inference and confidence intervals, Nolwenn Le Meur 6h</li> </ol> </li> <li>2) Inferential statistics <ol style="list-style-type: none"> <li>a. Tests: comparisons of frequency, Nolwenn Le Meur 4h</li> <li>b. Tests: comparisons of means, Nolwenn Le Meur 4h</li> <li>c. Analysis of variance, Nolwenn Le Meur 4h</li> </ol> </li> <li>3) Introduction to regression model <ol style="list-style-type: none"> <li>a. Correlation and simple linear regression, Nolwenn Le Meur: 4h</li> <li>b. Introduction to multiple linear regression, Nolwenn Le Meur: 4h</li> </ol> </li> <li>4) Introduction to planning and conducting a statistical analysis <ol style="list-style-type: none"> <li>a. Sample design and power analysis. Nolwenn Le Meur 4h</li> <li>b. Introduction to critical reading, Nolwenn Le Meur 4h</li> </ol> </li> <li>5) Field survey (shared with EPI) <ol style="list-style-type: none"> <li>a. Preparation &amp; Conduct. Florence Bodeau-Livinec and Nolwenn Le Meur 12h in total (+complement in the ISB module for data analysis)</li> <li>b. Results (group presentations). Florence Bodeau-Livinec and Nolwenn Le Meur 6h (shared with ISB)</li> </ol> </li> <li>6) Module Debriefing. Nolwenn Le Meur: 1h30</li> <li>7) Review session, N Le Meur 6h00</li> </ol> <p>Time for evaluations are not included here (see time schedule or details)<br/>Time is estimated from face-to-face teaching. The possible use of online courses may modify the duration and sequencing of lectures.</p> |

| <p><b>Course requirement</b></p>   | <p>Students are expected to read lectures before courses and work between classes. Students are expected to transmit their homework on time.</p>   |

| <p><b>Grading and assessment</b></p> | <p>The final grade results from two group works, homework, individual MCQs, and a final sitting exam (2-hour table assignment).</p> <p>Details assignments:</p> <table border="1" data-bbox="523 320 1503 925"> <thead> <tr> <th>n°</th> <th>Assignment topic</th> <th>% final grade</th> <th>Format</th> </tr> </thead> <tbody> <tr> <td>1</td> <td>Final exam</td> <td>50%</td> <td>Individual</td> </tr> <tr> <td>2</td> <td>Descriptive statistics (MCQ)</td> <td>5%</td> <td>Individual</td> </tr> <tr> <td>3</td> <td>Inferential statistics (MCQ)</td> <td>5%</td> <td>Individual</td> </tr> <tr> <td>4</td> <td>Statistical tests (MCQ)</td> <td>5%</td> <td>Individual</td> </tr> <tr> <td>5</td> <td>Introduction to regression model (MCQ)</td> <td>5%</td> <td>Individual</td> </tr> <tr> <td>6</td> <td>Review Quiz (MCQ)</td> <td>5%</td> <td>Individual</td> </tr> <tr> <td>7</td> <td>Homework</td> <td>5%</td> <td>Individual</td> </tr> <tr> <td>8</td> <td>Critical reading</td> <td>10%</td> <td>Group work</td> </tr> <tr> <td>9</td> <td>Field survey presentation</td> <td>10%</td> <td>Group work</td> </tr> </tbody> </table> <p>Note also that students will complete a questionnaire that assesses their own and their teammates' contributions to group work. All team members will receive the same grade except if it is clear that a student has not participated effectively (attended and contributed to meetings; made timely, helpful contributions; been constructive, etc.). In that case, the student's grade will be lowered accordingly.</p> <p>Homework not returned in due time will be graded zero.</p>   | n°            | Assignment topic | % final grade | Format | 1 | Final exam | 50% | Individual | 2 | Descriptive statistics (MCQ) | 5% | Individual | 3 | Inferential statistics (MCQ) | 5% | Individual | 4 | Statistical tests (MCQ) | 5% | Individual | 5 | Introduction to regression model (MCQ) | 5% | Individual | 6 | Review Quiz (MCQ) | 5% | Individual | 7 | Homework | 5% | Individual | 8 | Critical reading | 10% | Group work | 9 | Field survey presentation | 10% | Group work |

| 9                                    | Field survey presentation  | 10%           | Group work       |               |        |   |            |     |            |   |                              |    |            |   |                              |    |            |   |                         |    |            |   |  |    |            |   |                   |    |            |   |          |    |            |   |                  |     |            |   |                           |     |            |
| <p><b>Course policy</b></p>          | <p><b>Attendance &amp; punctuality</b></p> <p>In class, regular and punctual class attendance is a prerequisite for receiving credit in a course. Students are expected to attend each class. Attendance will be taken at each class. The obligations of attendance and punctuality cover every aspect of the course: - lectures, conferences, group projects, assessments, examinations, as described in EHESP Academic Regulations <a href="http://mph.ehesp.fr">http://mph.ehesp.fr</a> EHESP Academic Regulation Article. 3).</p> <p>If students are not able to make it to class, they are required to send an email to the instructor and to the MPH program coordinating team explaining their absence prior to the scheduled class date. All supporting documents are provided to the end-of-year panel.</p> <p>Students who miss class are responsible for content. Any student who misses a class has the responsibility for obtaining copies of notes, handouts and assignments. If additional assistance is still necessary, an appointment should be scheduled with the instructor. Class time is not to be used to go over material with students who have missed class.</p> <p><b>Lateness:</b> Students who are more than 10 minutes late may be denied access to a class. Repeated late arrivals may be counted as absences (See <a href="http://mph.ehesp.fr">http://mph.ehesp.fr</a> EHESP Academic Regulation Article. 3 Attendance &amp; Punctuality)</p> <p><b>Maximum absences authorized &amp; penalty otherwise</b></p> <p>Above 20% of absences will be designated a fail for a given class. The students will be entitled to be reassessed in any failed component(s). If they undertake a reassessment or they retake a module this means that they cannot normally obtain more than the minimum pass mark (i.e. 10 out of 20)</p> |               |                  |               |        |   |            |     |            |   |                              |    |            |   |                              |    |            |   |                         |    |            |   |  |    |            |   |                   |    |            |   |          |    |            |   |                  |     |            |   |                           |     |            |

|                                 |   |
|---------------------------------|---|
|                                 | <p><b>Exceptional circumstances</b><br/>Absence from any examination or test, or late submission of assignments due to illness, psychological problems, or exceptional personal reasons must be justified; otherwise, students will be penalized, as above mentioned. Students must directly notify their professor or the MPH academic secretariat before the exam or before the assignment deadline. Before accepting the student's justification, the professor or the MPH academic secretariat has the right to request either a certificate from the attending physician or from a psychologist, or from any other relevant person (See <a href="http://mph.ehesp.fr">http://mph.ehesp.fr</a> EHESP Academic Regulation Article 4 Examinations).</p> <p><b>Courtesy:</b> All cell phones/pages MUST be turned off during class time. Students are required to conduct themselves according to professional standards, eating during class time is not permitted during class time, such as course or group work.</p> |
| <p><b>Valuing diversity</b></p> | <p>Diversity enriches learning. It requires an atmosphere of inclusion and tolerance, which oftentimes challenges our own closely-held ideas, as well as our personal comfort zones. The results, however, create a sense of community and promote excellence in the learning environment. This class will follow principles of inclusion, respect, tolerance, and acceptance that support the values of diversity. Diversity includes consideration of: (1) life experiences, including type, variety, uniqueness, duration, personal values, political viewpoints, and intensity; and (2) factors related to "diversity of presence," including, among others, age, economic circumstances, ethnic identification, family educational attainment, disability, gender, geographic origin, maturity, race, religion, sexual orientation and social position.</p>  |
| <p><b>Course evaluation</b></p> | <p>EHESP requests that you complete a course evaluation at the end of the school year. Your responses will be anonymous, with feedback provided in the aggregate. Open-ended comments will be shared with instructors, but not identified with individual students. Your participation in course evaluation is an expectation, since providing constructive feedback is a professional obligation. Feedback is critical, moreover, to improving the quality of our courses, as well as for instructor assessment.</p>   |
